# Pietro Dardano

dardanopietro@libero.it | +39 334-2354857 | pietro-dardano | pietrodardano
PhD candidate in Embodied Ai for Robotics and Intelligent Vehicles

## Experience

- **PhD. Candidate - BMW Group [🌐]** *Munich | Mar. '25 - present*
  *Tools: C++, Python, PyTorch, IsaacSim, IsaacLab, ROS, ROS2*
  PhD Topic: Robust multimodal perception and learning in robotics and intelligent vehicles.
  Conducted at BMW Ai-Robotics Lab & RoboTac Lab, in collaboration with TU-Eindhoven. Supervised by Prof. M. Kaboli and Prof. S. Stujik.

- **Research Collaborator - University of Trento [🌐] - Supervisor: Prof. A. Del Prete** *Trento | Jun. '24 - present*
  *Tools: Python, Pytorch, Nvidia IsaacSim, IsaacLab, OpenAI Gymnasium, GIT* [🐙]
  Reinforced Learning for Walk and Stop for quadruped robot. PPO, DDPG and TD3 (SKRL and SB3). Trained on Nvidia IsaacSim and IsaacLab. Related **paper** in writing for submission to ICRA 26.

- **Master Thesis Intern - TXT E-TECH [🌐] - Supervisor: Prof. P. Rocco** *Milan | Sept. '23 - Oct. '24*
  *Tools: C++, Python (Pandas, Numpy, Tensorflow, Scikit-Learn, PyWt), UR_RTDE, ROS, ROS2, MoveIT2, GIT* [📄, 📄]
  Force-Driven validation for cobot in aeronautical environment. Multi-classification with Hybrid_CNN and eXplanable AI features. Achieved +96% F1-score, up to 99.2%. Related paper accepted for IAS-19.

- **Student Researcher - Politecnico di Milano [🌐] - Supervisor: Prof. L.M. Fagiano** *Milan | Sept. '23 - present*
  *Tools: C++, Python, Fusion360, Matlab, Simscape, Arduino* [🐙]
  Designed, assembled and controlled an actuated rig for safely testing stability algorithms of large autonomous drones and gliders, able to simulate wind and collision disturbances.

- **Head of Projects ('21), Vice & President ('22-'23), Arbitrator ('24) - AEA [🌐]** *Milan | Sept. '20 - present*
  Noting a lack of robotics projects and initiatives for students, I co-founded the Automation Engineering Association (AEA). Today it has over 400 members, with 8 projects engaging more than 110 students.

## Education

- **Doctor of Philosophy in Embodied Ai for Robotics** - ***TU Eindhoven*** *Eindhoven | Mar. '25 - present*
  PhD Topic: Robust multimodal perception and learning in robotics and intelligent vehicles.
  Conducted at BMW Ai-Robotics Lab & RoboTac Lab. Supervised by Prof. M. Kaboli and Prof. S. Stujik.

- **MSc. Automation and Control Engineering** - ***Politecnico di Milano*** *Milan | Sept. '21 - Oct. '24*
  GPA: 3.78/4.00 | Robotics, Ai, Autonom. Vehicles | Erasmus+ at Univ. Politecnica de Madrid (a.y. '22-'23).

- **BSc. Automation Engineering** - ***Politecnico di Milano*** *Milan | Sept. '18 - Sept. '21*
  GPA: 3.4/4.0 | Building the theorethical foundamentals for the MSc and PhD

## Selected Projects

- **Control of a Magnetic Levitation system - Supervisor Prof. G. Cazzulani** *Feb. '23 - Jun. '23*
  *Tools: Fusion360, FEMM, Matlab, Simulink* [📄]
  Linear and Non-linear control strategies, Extended Kalman Filters for estimation, behaviour prediction.

- **Odometry and SLAM for mobile robot - Supervisor Prof. M. Matteucci** *Apr. '22 - Jul. '22*
  *Tools: C++, Python, ROS, GIT* [🐙]
  ROS architecture | Odometry: sensorfusion, TF transform. | SLAM: **gmapping** and **amcl**.

- **IEEE VTS Challenge 2020 at Politecnico di Milano (PoliMi) [🌐]** *Feb. '21 - Jun. '21*
  *Tools: Matlab, Simulink*
  EV truck's control system: PID and switching-based EMS, 87% efficiency, 4th ranked.

## Extra

- Lead The Future - Mentee : mentorship program for STEM student with acceptance rate below 13%.
- Competitive programming: ITACPC, AdventOfCode, Reply Code: C, C++, Python.
- Hackathon Finalist: MVA Driving Innovation '22; A2A All4Climate '21.
